The *Smart Salary Chain*

Blockchain-powered, certified payroll processing

Current **issues** with salary administration and regulations:
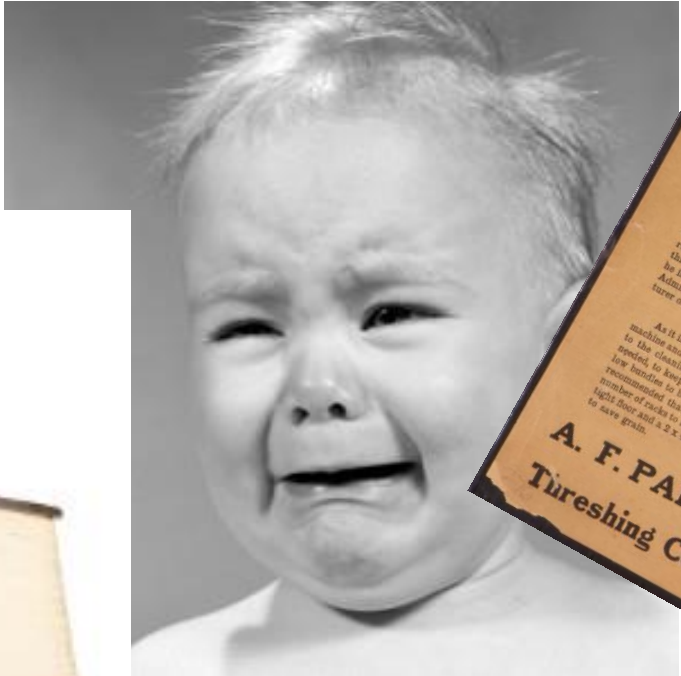

Headache for big businesses, small businesses...
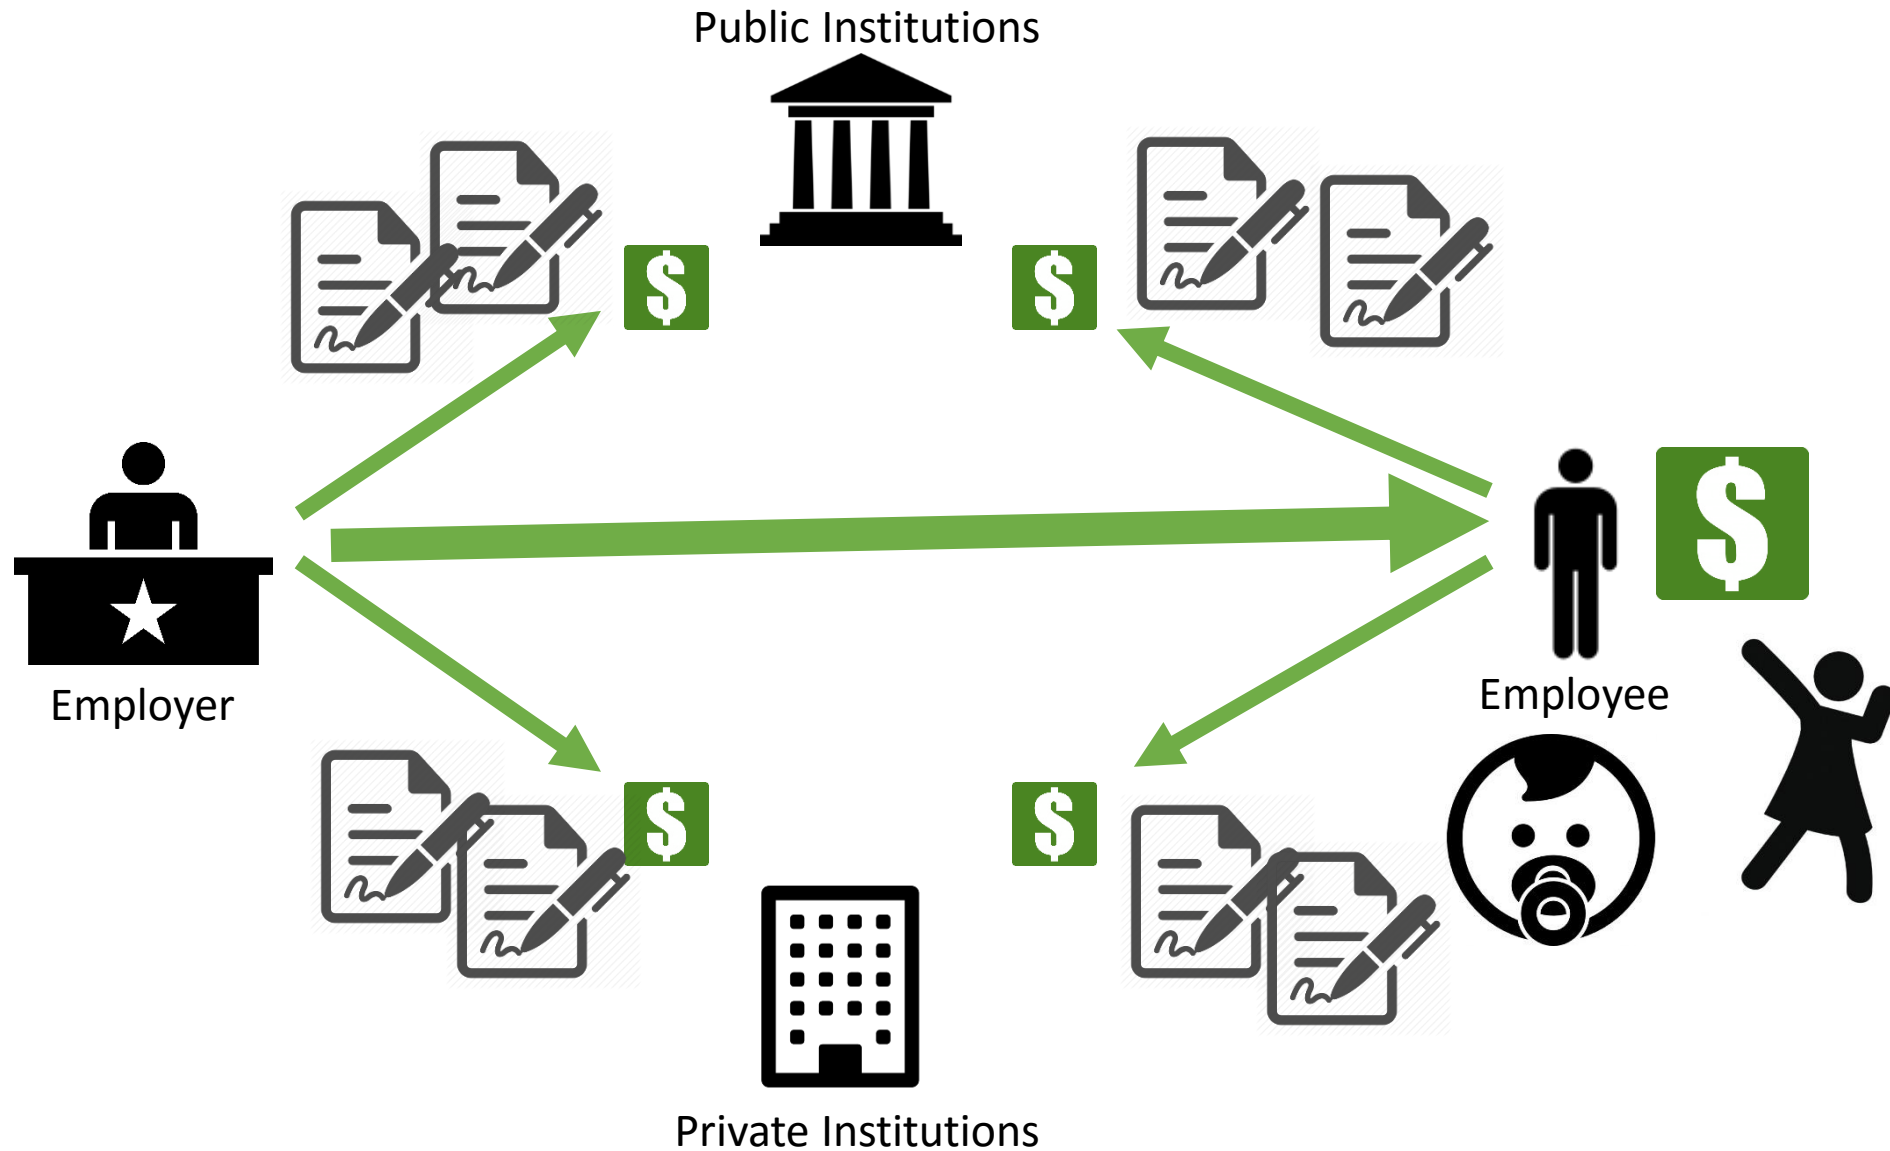

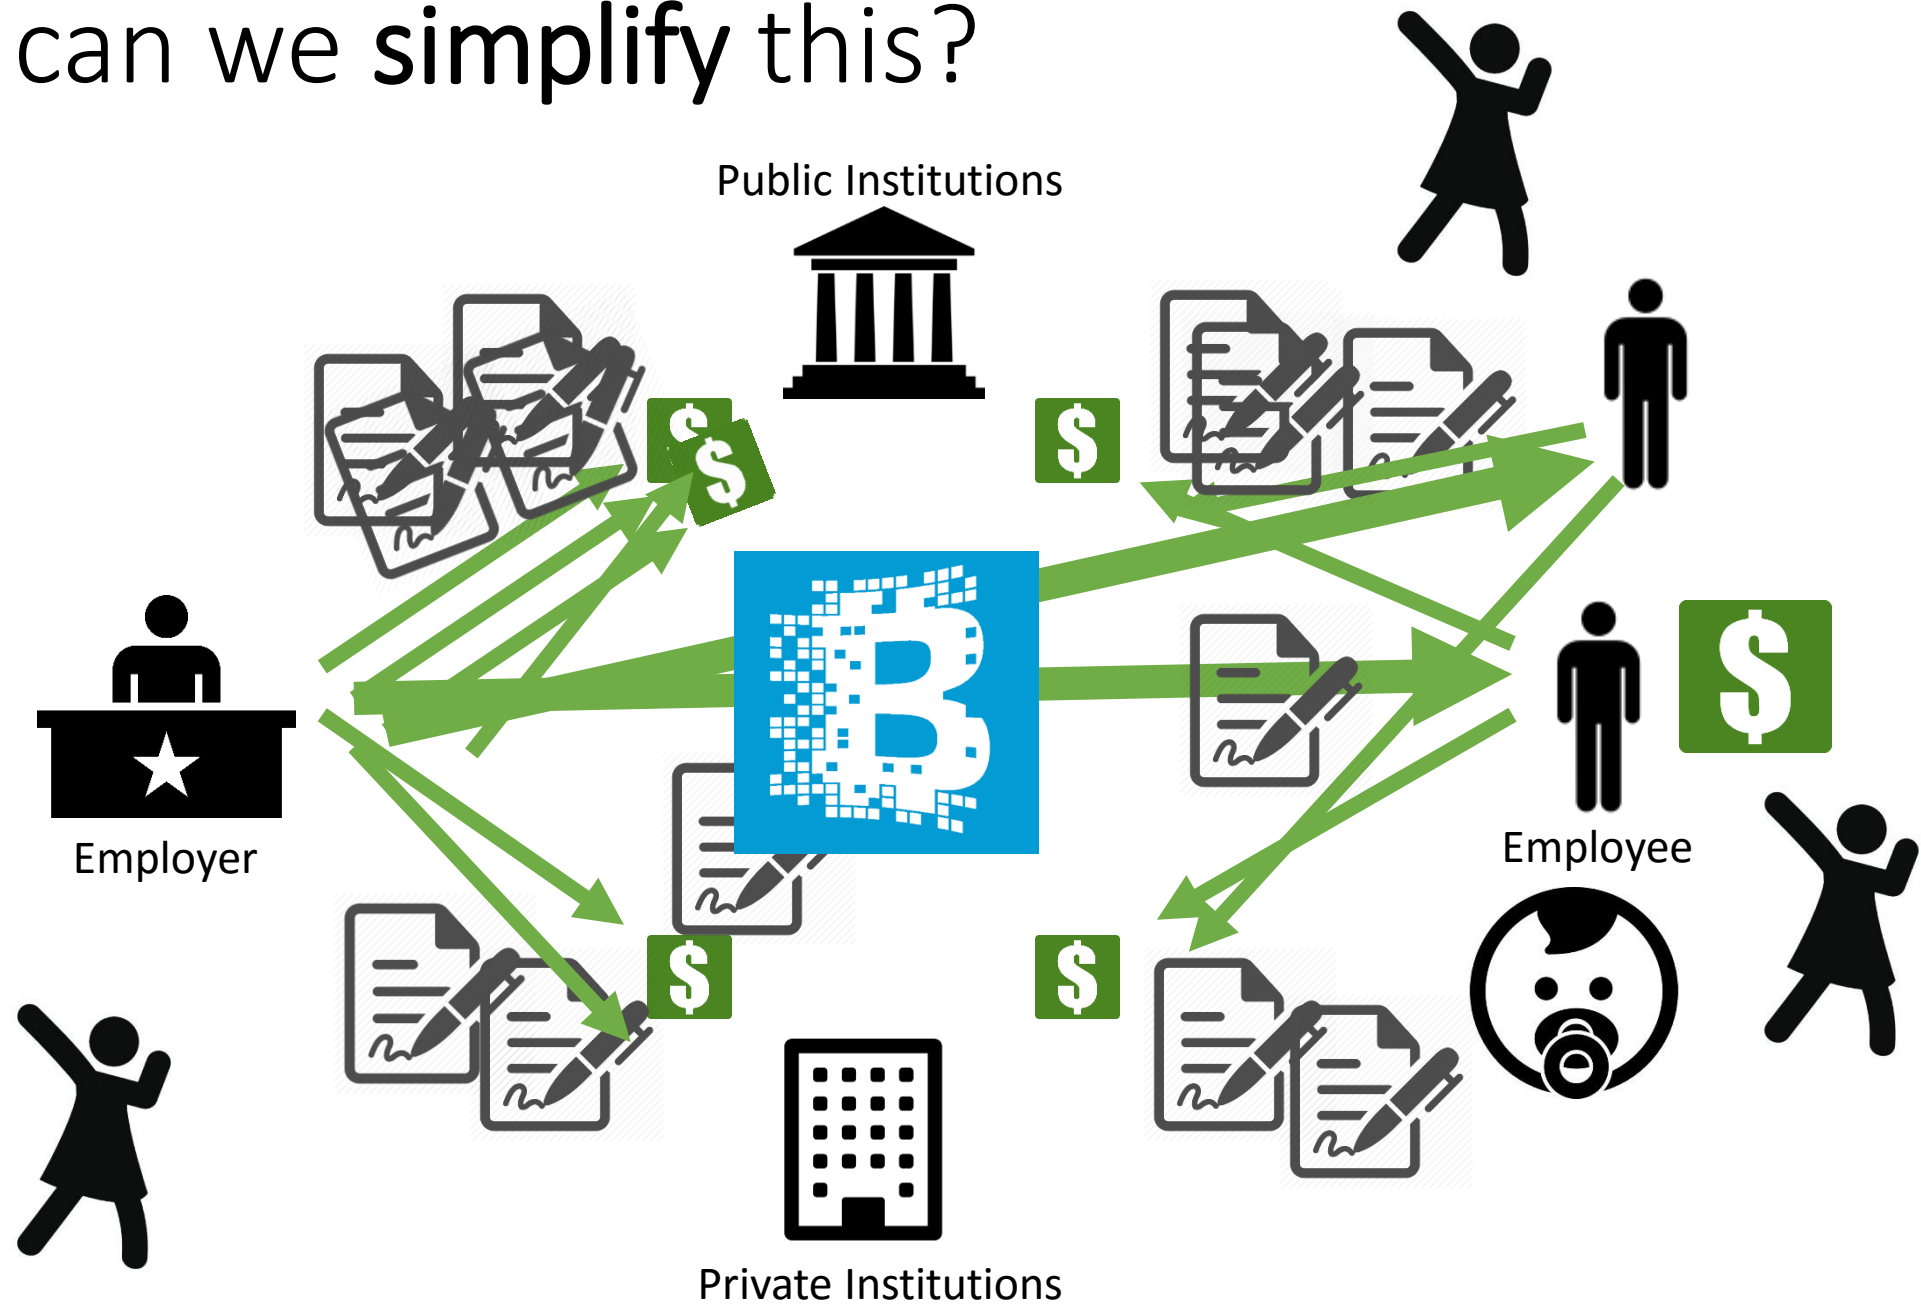

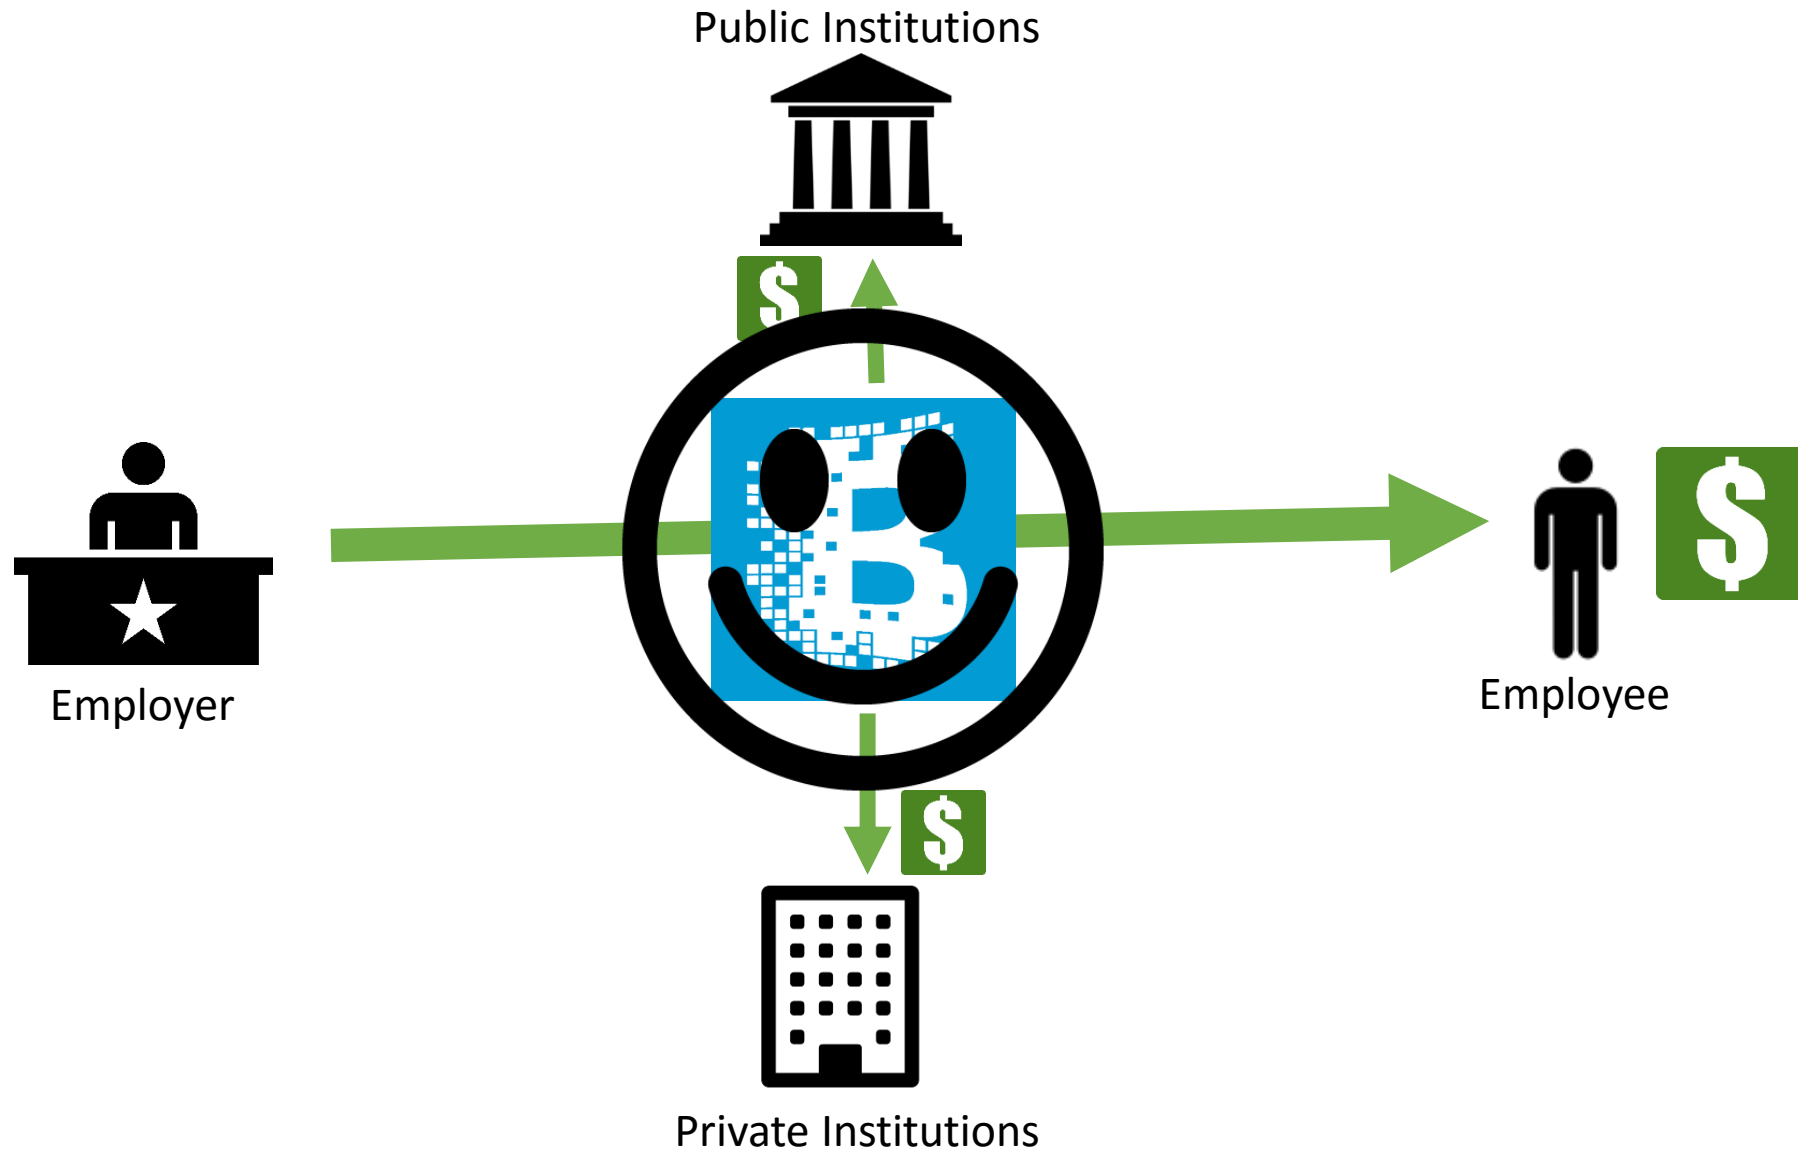

…let alone for the emerging P2P and sharing economies…

What is it all about?

How can we **simplify** this?

Smart Contracts to the rescue!

Stop for a second…

We heard the rules:

Is it a real blockchain use case?

- ✔ The shared database
- ✔ Multiple writers
- ✔ Absence of trust
- ✔ Disintermediation
- ✔ Transaction interaction
  collaborative transactions,e.g. DvP, Smart Contracts
- ✔ Rules
  e.g. balance
- ✔ Validators
  single organisation, group or everyone
- ✔ Assets
  who is backing digital assets?
